November 29, 2021

To whom it may concern,

We, Anbio (Xiamen) Biotechnology Co. Ltd, the manufacturer of the Rapid COVID-19 Antigen Test (Colloidal Gold), hereby declare that our test is effective for, but not limited to, the mutant strain and the following variants; SARS-CoV-2 of Alpha (B1.1.7), Beta (B.1.351), Gamma (P.1), Delta (B.1.617.2), Epsilon 9B.1.427/B.1.429), Zeta (p.2), Eta (B.1.525), Theta (P.3), Iota (B.1.1.529).

The aforementioned variants have several mutations in the spike protein and minimal mutations in the nucleocapsid protein.

There is no obvious difference when testing with different recombinant nucleocapsid protein antigens (Alpha, Beta, Gamma, Delta, Epsilon, Zeta, Eta, Theta, Iota, Kappa, Lambda, Mu and Delta plus), based on these different variants of SARS-CoV-2.

The theoretical analysis of the mutations in the nucleocapsid protein suggests no apparent interference for the Rapid COVID-19 Antigen Test (Colloidal Gold) with detecting the Omicron variant of Covid-19. We do not anticipate that these variants will have any effect on test performance.

Sincerely,

**Anbio (Xiamen) Biotechnology Co.,Ltd.**
